ASSUREGO+
Health & Safety Reporting in Everyone's Hands

Do you know what is happening across your organisation?

Many organisations underreport safe and unsafe conditions, near misses and hazards, which can turn into more serious events. Without these indicators it is very challenging to change and improve health and safety performance.

Empower your employees to be actively engaged in health and safety.

Enable everyone to report events, access information and manage their actions, anytime and in any location.

Ditching pen and paper removes barriers to reporting and allows quicker follow up. By capturing information on-the-go, you save time, collate more accurate data and prompt a faster response to health and safety events and activities.

EXPECTED OUTCOMES

Engage users – Empower everyone by making it easy to report whatever they see.

Improve performance – Generate better data that will support strategic decision making.

Drive ownership – Ensure anybody across your organisation can own and complete safety processes.

Provide visibility – Provide your team with quick and easy access to relevant safety information.

HOW DOES IT WORK?

Mobile web app – Use it on any device, with no need to download. Accessible with or without login.

Easy-to-use – Provide it to everybody. Responsive to different device screens, fully compliant with latest accessibility guideline (WCAG 2.1), designed for zero training.

Available offline – Download forms and capture information when offline.

Share – Access records and important documents, including risk assessments, policies and procedures.

Close actions – Log in to view, manage and close your open actions whilst on the go.

Utilise device features – Attach supporting information, add and annotate photos, capture digital signature and location information.

Make it your own – Create your own forms, add your company branding, terminology and form icons to drive adoption.

WHAT'S INCLUDED?

INCIDENT
Equip your workforce with the tools to report all types of unwanted events immediately.

RISK
Enable all users to access relevant risk management information anytime from any location. Make hazard reporting simple.

AUDIT
Create standard audits and inspection available for anyone to complete.

ASSET
Complete testing and maintenance of equipment on the go.

BEHAVIOUR
Encourage all parties to make safety observations and participate in leadership tours.

CONTRACTOR
Standardise pre-qualification and management of contractors.

ENVIRONMENT
Carry out environmental audits and inspections to monitor environmental compliance.

Proactively Manage Safety with Assure

The Assure EHS solution enables organisations to transform their health and safety processes by managing all activities in one central tool. Report and capture all your safety data on the mobile web app AssureGO+. Trigger next steps with automated workflows and ensure that required actions are closed out effectively.

Visualise and analyse activities in easy-to-use, configurable dashboards, enabling your organisation to make the right strategic decisions and drive improvement.
